

Abstract

Developing/Designing a website for providing the users with reliable and transparent interior design firm. Hence, helping out different people by building the interior designs for either their own home, retail or office . Also it provides the users with a view of different interior designs that have been completed by “Chartered Interiors” viewing the varied portfolio of these interior designs, individuals can select which they would like to construct at their own place.

Chartered Interiors a force to reckon with in the interior design space in Bangalore, has established as a one-stop shop for design consultancy and execution in Bangalore. Chartered Interiors has developed highly skilled, aesthetically inclined and promising home or office interiors designers in bangalore.

Introduction

Through this website "Chartered Interiors" is trying to provide every people an opportunity to build a better interior designs for homes, retail or office purpose. With a number of well executed projects in the credit of "Chartered Interiors", it has established a one-stop shop for design consultancy and execution. From initial talks to handing over your home after finishing the project, " Chartered Interiors" will provide all services that comes under interior designing.

For each and every individual home is a reflection of their own tastes and everyone would like to build it in a way they want. "Chartered Interiors" provides different individuals to describe their own interior designs which they have dreamt to have it in their own home .Also it provides different interior designs which they have designed for different people looking at which different individuals may also have a dream to have such an interior design at their homes ,retail or office. Hence, all the individuals will be able to fulfil their dreams through "Chartered Interiors" as it helps the individuals to build either their home designers ,retail designers or office designers of their own choice.

Hardware/software requirements

HARDWARE- Desktop or Laptop(Ram 256MB,HDD-40GB)

SOFTWARE- Frontend : HTML, CSS, JavaScript and Bootstrap.

Backend : PHP(version 5.3 and above), Mysql ,Apache.

Server Configuration :

Apache Version :2.4.9 - [Documentation](#)

PHP Version :5.5.12 - [Documentation](#)

Server Software:Apache/2.4.9 (Win32) PHP/5.3

phpMyAdmin Version : 3.3.9

MySQL Version:5.5.8

Chartered Interiors

b) ER Diagram for Blog Module.

MODULES

The modules involved are :

- Portfolio - In this module we have three subcategories:

a)Home Designers -> It includes different designs which have been completed by “Chartered Interiors” for different user and anyone who would like to build any of these designs for their own home can contact "Chartered Interiors" by filling your details in “Contact Us” module.

b)Retail Designers -> It includes different designs which have been completed by “Chartered Interiors” for different retail purpose like Showrooms, shops etc and anyone who would like to build any of these designs for their own retail purpose they can contact “Chartered Interiors” by filling your details in “Contact Us” module.

c)Office Designers-> It includes designs which have been completed by “Chartered Interiors” for different office places. Anyone Who would like to have these interior designs at their office can contact “Chartered Interiors” by filling your details in “Contact Us” module.

Chartered Interiors

- Blog - This module allows users to view different styles of interior designs. It includes all the categories either home, retail or office all the details and descriptions of different interior styles will be mentioned here. Further this module will be modified where every user of chartered interiors will be given an id and password and can directly add any number of design and description about it either in home, retail or office designers.
- Contact Us - In this module any user who would like to get in touch or contact “Chartered Interiors” for any further queries about the interior designs would have to fill in his/her details in the form which will be provided in this module.
- Get In Touch -This module also allows the interested users to get in touch with chartered interiors. The user has to fill in the details and submit it after which the user can interact with the members of chartered interiors and can get their desired interior designs constructed in time.

CODE IMPLEMENTATION

1.Login Page.

```
<?php
session_start();

if(isset($_SESSION['login_user'])){

    header("location:comments");

}

include("../includes/config.php");

if($_SERVER["REQUEST_METHOD"] == "POST") {

    // username and password sent from form

    include("includes/class.php");

    $name=$_POST['name'];

    //$password=$_POST['password'];

    $password_without_encryption=$_POST['password'];

    $password=md5($password_without_encryption);

    $arrayValues1=$_POST['name'];

    $arrayValues2=$password;

    $table_name="user";

    $field_name1="user_name";

    $field_name2="password";

    $selectVal = new databaseoperation();
```

```
$form_values="";

$count=$selectVal-
>selectValues($table_name,$field_name1,$field_name2,$arrayValues1,$arrayValues2);

if($count > 0)

{

    if(empty($_SESSION['login_user']))

    {

        header("location:comments");

    } else

    {

        header("location:comments");

    }

}

else

{

    $error= "Invalid User name or Password";

}

}

?>

<?php include_once('../includes/gzip.php'); ?>

Fig 1. Contact-us

Chartered Interiors

The screenshot displays the Chartered Interiors website with a 'Get In Touch' contact form overlay. The form includes the following fields:

- Name
- Email ID
- Phone Number
- Location
- Choose the construction stage of your home
- Choose the property type
- Your Question

A red asterisk indicates that all fields are required. A red 'SUBMIT' button is located at the bottom of the form. The background shows a gallery of interior design images and a navigation menu with links to 'HOME', 'PORTFOLIO', and 'HOME DESIGNERS'. The website's logo and social media icons are also visible.

Chartered Interiors

The screenshot displays the phpMyAdmin interface for the 'chartered' database. The 'categories' table structure is shown with the following columns:

#	Name	Type	Collation	Attributes	Null	Default	Extra	Action
1	category_id	int(5)			No	None	AUTO_INCREMENT	Change Drop Primary Unique Index Spatial Fulltext Distinct values
2	user_id	int(5)			No	None		Change Drop Primary Unique Index Spatial Fulltext Distinct values
3	category_name	varchar(50)	latin1_swedish_ci		No	None		Change Drop Primary Unique Index Spatial Fulltext Distinct values
4	category_url	varchar(50)	latin1_swedish_ci		No	None		Change Drop Primary Unique Index Spatial Fulltext Distinct values
5	created_date	datetime			No	None		Change Drop Primary Unique Index Spatial Fulltext Distinct values
6	modified_date	datetime			No	None		Change Drop Primary Unique Index Spatial Fulltext Distinct values
7	status	int(5)			No	None		Change Drop Primary Unique Index Spatial Fulltext Distinct values

Below the table structure, the 'Information' tab is selected, showing space usage and row statistics:
